

HOSTAPHAN®

Mitsubishi Polyester Film GmbH is the European site of the world wide operating Mitsubishi Polyester Film Group, who is one of the global leaders and one of the largest suppliers of polyester film (PET – polyethylene terephthalate) of the world class brands Diafoil® and Hostaphan®. The Mitsubishi Polyester Film Group is part of Mitsubishi Chemical Corporation with headquarter in Tokyo.

Since 1955 Hostaphan® PET-Film has been produced in Wiesbaden. Today, high quality and performance proven Hostaphan® special films in thicknesses ranging from 4 up to 500 micron are being developed and produced in world standard set quality and product-range in this plant. Areas extend from high technological industrial applications, food-packaging, medical-/pharmaceutical products to TTR. Building on experience of half a century worth, the Mitsubishi-Polyester-Film-Group and their parent company, the Mitsubishi Chemical Holdings Corporation are creating unique engineered PET solutions to satisfy our customer's requirements.

Our technological competence is regionally anchored and intensified through our global Company-group. Along with our modern production-lines with co-extrusion and inline-coating capabilities integrated in the process it allows us to offer a broad range of value added performance options for our Hostaphan® products.

Regional customer service in the whole of Europe enables us to manage development projects together with our customers. Through the close co-operation with our American and Japanese research-, development- and production sites we can pool our global know-how and ability to help make the business ideas of our customers succeed.

At Mitsubishi Polyester Film GmbH, quality management includes the constant optimization of the used raw materials as well as our products and production procedures and the commitment to stringent environmental and safety standards at every stage of the production process. Mitsubishi Polyester Film GmbH is certified by DIN EN ISO 9001, DIN EN ISO 14001, DIN EN ISO 50001, as well as BRC.

Sustainability is a topic we care strongly about. Our company is managed according the Japanese KAITEKI philosophy, which combines the aspects sustainability, health and quality of life.
