

Hostaphan® RNK 2PRK

Transparent, siliconised polyester film for release liners

Hostaphan® RNK 2PRK is a one side silicone coated, biaxially oriented film, made of polyethylene terephthalate (PET) and characterized by outstanding properties. The siliconised film is designed to be used in release liner applications. Because the silicone is highly cured, there is essentially no migration of the silicone to any adhesive which may be in contact with the film. The film is not permitted to be used in food applications in the EU.

WARNING:

Silicone coated film is very slippery. Do not discard scrap film on the floor. Injury may result if stepped on.

The release force given in this datasheet has been measured using a standard commercial adhesive tape. In our experience, release levels vary with different pressure sensitive adhesives, face-stock materials and thickness as well as test conditions. Actual release force needs to be measured specifically for any given liner/adhesive/face-stock structure.						
Subsequent adhesion	19, 23, 30	%	> 90	-	-	Similar to FINAT FTM 11
Smear	19, 23, 30	-	None	-	-	Haze observed when rubbed once with index finger
Rub-off	19, 23, 30	-	None	-	-	Coating removed when rubbed hard with index finger

MD = Machine direction, TD = Transverse direction

Applications:

- Release liner for label stock
- Other release applications
